

Caesars Entertainment has updated its cash policy in poker rooms enterprise-wide.

**Effective May 1, 2015, gaming action at individual cash-game poker tables (aka live action games) will be cashless.** This means that cash will no longer play on poker tables in our gaming destinations. Poker players will be required to purchase casino chips with cash to participate in any live-action poker game.

We believe this decision best aligns our guest experience to stay up to date with evolving industry standards and ensure our operations can deliver great experiences consistently. It is important to note that this new poker cash game policy has no impact on any poker tournament we offer, as those have always been run exclusively with non-value tournament poker chips.
